Sexual Health Add-On Test

Customer Care: 866-287-3218 Fax: 940-295-1483 HealthTrackRx.com

MRC INSTRUCTIONS - MANDATORY

PAGE 1
1. Fill in requestor's first and last name in field 1.
2. Fill in the patient name in field 2 exactly as it appears in on the final report.
3. Fill in patient's date of birth (DOB) in field 3
4. Fill in the appropriate lab accession number in field 4. (lab accession number found in top right of results)
5. Choose whether this is an add-on, replacement, or deletion of order in field 5.
6. Choose either the full panel or individual pathogens within panel, then the swab site and the antibiotic resistant genes. You may only choose from one whole panel.

PAGE 2
1. Update ICD code as necessary in field 6.
2. Print ordering provider's name in field 7.
3. Ordering provider must leave a signature in field 8.
4. Fill out the date in field 9.
5. Submit paperwork to HealthTrackRx via fax at (940) 295-1483, or via email at customer@healthtrackrx.com

THE FOLLOWING FIELDS MUST BE FILLED OUT BEFORE SUBMITTING PAPERWORK

I, [1] request that the following information be corrected and/or tests (listed below) be added to the previously submitted sample. This is to serve as a correction and/or as an addendum to the originally submitted requisition and to each of the previous test orders originally submitted.
Patient Name (as it appears on the final report): [2]
Patient DOB (as it appears on the final report): [3] Lab Accession Number: [4]
Please update the following tests to this sample: [5] Add-On [6] Replace [7] Delete
Orders must be specifically listed either by panel, pathogen, or specific gene you wish to have added. If you need additional room, please submit a corrected requisition.
**Signature of the ordering provider is REQUIRED for updating test orders

COMPLICATED GENITOURINARY INFECTION
Sample Type: [8] Urine (voided) [9] Urine (catheter) [10] Internal Urethra [11] Cervical/Endometrial [12] Oropharynx/Throat/Oral [13] Penile Meatus [14] Genital Skin [15] Rectal/Anal [16] Vaginal [17] Vulva/Labia/Vestibule/Perineal
[18] Acinetobacter baumannii [19] Citrobacter freundii [20] Mycoplasma genitalium [21] Staphylococcus saprophyticus
[22] Atopobium vaginae [23] Enterobacter cloacae complex, Klebsiella [24] Mycoplasma hominis [25] Streptococcus agalactiae¹
[26] BVAB 2, 3 (bacterial vaginosis-associated bacteria 2, 3); Mobiluncus spp. [27] (Enterobacter) aerogenes [28] Neisseria gonorrhoeae [29] Streptococcus pyogenes²
[30] Candida albicans, parapsilosis, tropicalis [31] Enterococcus faecalis, faecium [32] Proteus mirabilis, vulgaris [33] Trichomonas vaginalis
[34] Candida glabrata (Nakaseomyces glabratus) [35] Escherichia coli [36] Pseudomonas aeruginosa [37] Ureaplasma urealyticum
[38] Candida krusei (Pichia kudriavzevii) [39] Gardnerella vaginalis [40] Serratia marcescens [41] Ureaplasma parvum
[42] Chlamydia trachomatis [43] Klebsiella pneumoniae, oxytoca [44] Staphylococcus aureus
[45] [46] Megasphaera (Types 1, 2) [47] Staphylococcus epidermidis, haemolyticus, lugdunensis
[48] Antibiotic Resistance Genes SHV, KPC Groups⁶ qnrA1, qnrA2, qnrB2⁹ ACT, MIR, FOX, ACC Groups¹²
VanA, VanB⁴ dfr (A1, A5), sul (1, 2)⁷ tet B, tet M¹⁰ OXA-48,-51¹³
ermB, C; mefA⁵ mecA⁸ IMP, NDM, VIM Groups¹¹ CTX-M1 (15), M2 (2), M9 (9), M8/25 Groups⁶

URETHRITIS / DISCHARGE
Sample Type: [8] Urine (voided) [9] Internal Urethra
[18] Chlamydia trachomatis [19] Mycoplasma hominis [20] Ureaplasma parvum [21] Antibiotic Resistance Genes:
[22] Herpes simplex virus 1 [23] Neisseria gonorrhoeae dfr (A1, A5), sul (1, 2)⁷
[24] Herpes simplex virus 2 [25] Trichomonas vaginalis ermB, C; mefA⁵
[26] Mycoplasma genitalium [27] Ureaplasma urealyticum tet B, tet M¹⁰

VAGINITIS
Sample Type: [8] Cervical/Endometrial [9] Vaginal [10] Vulva/Labia/Vestibule/Perineal [11] Urine (voided)
[18] Atopobium vaginae [19] Candida krusei (Pichia kudriavzevii) [20] Neisseria gonorrhoeae [21] Antibiotic Resistance Genes:
[22] BVAB 2, 3 (bacterial vaginosis-associated bacteria 2, 3); Mobiluncus spp. [23] Chlamydia trachomatis [24] Trichomonas vaginalis dfr (A1, A5), sul (1, 2)⁷
[25] Candida albicans, parapsilosis, tropicalis [26] Gardnerella vaginalis ermB, C; mefA⁵
[27] Candida glabrata (Nakaseomyces glabratus) [28] Herpes simplex virus 1 tet B, tet M¹⁰
[29] [30] Herpes simplex virus 2
[31] Megasphaera (types 1, 2)

RECURRENT VAGINITIS
Sample Type: [8] Cervical/Endometrial [9] Vaginal [10] Vulva/Labia/Vestibule/Perineal [11] Urine (voided)
[18] Atopobium vaginae [19] Candida krusei (Pichia kudriavzevii) [20] Mycoplasma genitalium [21] Antibiotic Resistance Genes:
[22] BVAB 2, 3 (bacterial vaginosis-associated bacteria 2, 3); Mobiluncus spp. [23] Chlamydia trachomatis [24] Mycoplasma hominis dfr (A1, A5), sul (1, 2)⁷
[25] Candida albicans, parapsilosis, tropicalis [26] Gardnerella vaginalis [27] Neisseria gonorrhoeae ermB, C; mefA⁵
[28] Candida glabrata (Nakaseomyces glabratus) [29] Herpes simplex virus 1 [30] Trichomonas vaginalis tet B, tet M¹⁰
[31] Herpes simplex virus 2
[32] Megasphaera (types 1, 2) [33] Ureaplasma urealyticum
[34] Ureaplasma parvum

CGT (ASYMPTOMATIC)
Sample Type: [8] Urine (voided) [9] Internal Urethra [10] Cervical/Endometrial [11] Vaginal [12] Vulva/Labia/Vestibule/Perineal [13] Oropharynx/Throat/Oral [14] Penile Meatus [15] Genital Skin [16] Rectal/Anal
[18] Chlamydia trachomatis [19] Neisseria gonorrhoeae [20] Trichomonas vaginalis

¹ Group B Strep ⁵ Class A beta-lactamase ⁹ Tetracycline ¹³ Human Herpesvirus 4, EBV
² Group A Strep ⁶ Trimethoprim/Sulfamethoxazole ¹⁰ Class B metallo-beta-lactamase ¹⁴ Syphilis
³ Group C & G Strep ⁷ Methicillin ¹¹ AmpC beta-lactamase
⁴ Macrolide, Lincosamide, Streptogramin ⁸ Fluoroquinolone ¹² Class D oxacillinase
